PROJECTS

LapiFy

- Laptop Inventory Management System (**Django, Python, Bootstrap, SQLite**)
  Built a full-stack web application for laptop stock management with secure authentication, **CRUD** operations, and responsive **UI**. Implemented features such as stock tracking, password reset via email, and an interactive dashboard.
- Reduced manual tracking of laptops for shop owners.
- Provided a **centralized, digital, and secure platform** for managing laptop stock.
- Enhanced **efficiency and accessibility** compared to manual record-keeping.

- Source Code Link :- https://github.com/runankpatil08/Full_Stack

Digital Banking System

- This simple yet powerful console-based application enables users to efficiently manage their account records by:
  - Cash deposit
  - Cash withdraw
  - Check balance

College Student Admin Portal

- Our project is an ambitious undertaking aimed at enhancing the college experience for students while streamlining administrative processes
